

THIRA/SPR Services

Security Assessment Experts

THIRA/SPR

The U.S. Department of Homeland Security's Federal Emergency Management Agency requires that all Homeland Security Grant Program recipients annually submit a Threat and Hazard Identification and Risk Assessment (THIRA) and Stakeholder Preparedness Review (SPR). Implemented in 2012, the THIRA/SPR process is an in-depth evaluation of a jurisdiction's capability to address identified terrorism threats, natural hazards, and technological incidents.

Assessment Expertise

Secure Passage is a premier provider of THIRA/SPR reporting and has been supporting risk and capability assessment work for a diverse set of public safety agencies, local jurisdictions, states, and federal entities since 1998. Our team supported the creation and implementation of the original State Preparedness Report and has been the leading consultant for THIRA/SPR reporting since the requirement was first introduced, producing over 75 THIRAs and Stakeholder Preparedness Reviews (SPRs) for states and UASI urban areas, nationwide. In alignment with annual FEMA requirements, **Secure Passage** offers comprehensive THIRA/SPR support to client jurisdictions, including integration of urban area and state THIRA/SPR processes, development of measures and metrics to assess against THIRA targets, facilitation of workshops, roll-up and aggregation of THIRA/SPR results, and more. In all cases, we develop a rigorous process to capture and analyze data and engage stakeholders in a meaningful and highly useful assessment process.

Over 75 THIRA/SPRs conducted since 2012, including the above major UASI areas.

Secure Passage implements proven methods that:

- Adhere to the latest federal guidelines and requirements.
- Leverage best practices to minimize the impact on limited local resources.
- Rely on vetted data & analytics, making the report an ongoing planning tool.
- Ensure on-time and in budget completion, including Unified Reporting Tool entry.

Continuous & Customized Support

Secure Passage provides continuous project management support for the duration of the THIRA/SPR project to deliver a premium product on time and within budget. Working with client partners, we develop and maintain an appropriate schedule based on FEMA's annually updated THIRA/SPR reporting requirements. **Secure Passage** conducts outreach and engagement with subject matter experts and stakeholders, tailoring approaches as appropriate. This process is enhanced using our own methodologies and expertise, including our standardized surveys designed to collect capability data in advance of THIRA and SPR workshops, which we can facilitate. Further, we regularly participate in relevant FEMA implementation support and after-action activities alongside or on behalf of our THIRA/SPR clients.

Whether you are an existing client, developing a THIRA/SPR that builds on your existing **Secure Passage** assessment services, or starting from scratch, our experts will produce your THIRA/SPR reports, on-time and on-budget.
