

Behavioral Threat Assessment with Case Management:

Safety Through Insight

As violence escalates in schools and society, the mission to protect human life has never been more urgent. Experts recognize that focusing on mental health and wellness is key to mitigating threats before they escalate. Secure Passage offers an advanced, comprehensive solution for to enhance school safety with the **Behavioral Threat Assessment with Case Management (BTA)**. This proactive approach combines cutting-edge technology and strategic insight to identify at-risk individuals before a crisis unfolds, safeguarding through early intervention.

The Challenge:

The rising tide of violence in schools requires an urgent, comprehensive response to ensure the safety and well-being of students, staff, and the community. With threats often emerging from behavioral indicators that may go unnoticed or ignored, traditional methods of school safety are no longer enough. School officials need a system that not only addresses immediate concerns but also tracks emerging patterns and prevents future risks by focusing on mental health and wellness.

The Solution:

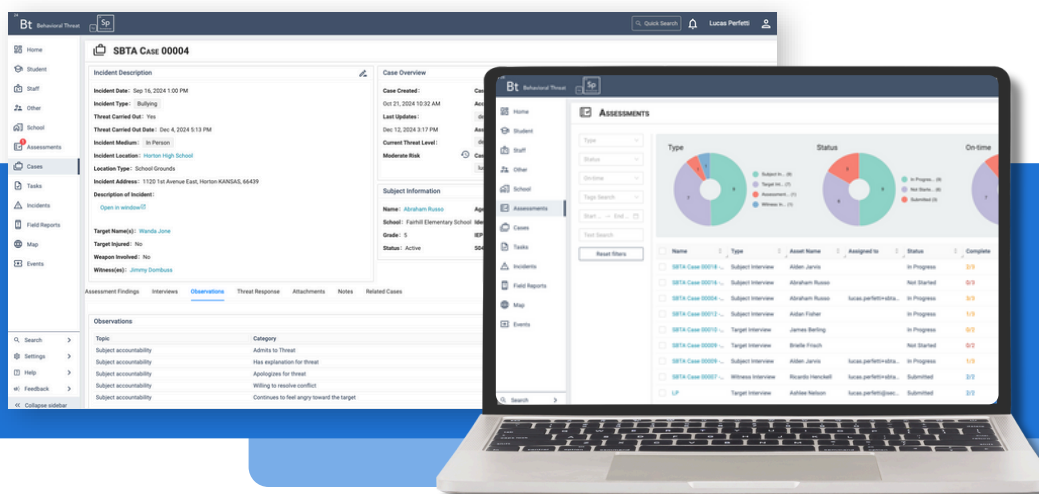

The Behavioral Threat Assessment (BTA) solution by Secure Passage offers a complete framework for managing and mitigating risks in schools. Built around the U.S. Secret Service NTAC model, BTA is a privacy compliant system designed to assess, manage, and resolve potential risks before they escalate. With BTA, schools can proactively track behavioral trends, coordinate critical information, and respond quickly to emerging risks.

Key Features:

- **Comprehensive Case Management:** Manage incidents from initial report through resolution with an integrated case management platform.
- **Collaborative & Efficient Workflow:** Integrated workflows allow for seamless collaboration across school teams, reducing information silos and improving response times.
- **Data Integration:** Seamlessly integrates with existing data sources, such as student information systems and law enforcement databases.

Data Security & Compliance:

Built on a secure SaaS platform with strong data encryption, providing compliance with privacy regulations and safeguarding sensitive information.

Key Benefits:

Identify students trending toward crisis before violence occurs, using data-driven insights.

Enhanced Safety

Behavioral Threat

Configurable to the needs of any individual school or district while aligning with state regulations and student privacy laws.

Actionable Insights

Gain concise and actionable insights from complex security data.

Customizable, Scalable & Compliant

Safety Through Insight:

With BTA by Secure Passage, school leaders can create a safer, more supportive environment where risks can be identified and addressed before they escalate, and the well-being of every individual is prioritized. Through early identification, coordinated response, and robust data security, BTA enables school leaders to proactively take control and mitigate at the onset of concerning behaviors. With a mission rooted in the protection of human life, Secure Passage transforms traditional, reactive safety measures into proactive solutions for a more secure future.

About Secure Passage:

Secure Passage is a leader in advanced security solutions, dedicated to protecting what matters most—human life. With a history of innovation in risk management, we deliver industry-leading tools that integrate technology, intelligence, and best practices. Our comprehensive security ecosystem includes the **Truman Physical Detection & Response Platform (PDR)** for proactive risk management, the **Haystack Operational Intelligence Center (OIC)** for organizational and community safety, and **Strategic Services** to address diverse security needs. By providing organizations with the insights and resources to enhance safety in schools, workplaces, and communities, Secure Passage continues to build trust and resilience nationwide.

Comprehensive School Security:

At the heart of the Haystack OIC is Hx for School Safety, a symbiotic partner to School Behavioral Threat

Assessment (BTA). While both are standalone platforms, combined they form a school safety powerhouse, integrating both behavioral and physical threat detection and response. This comprehensive approach enables proactive protection for students and staff, helping organizations enhance safety across schools, workplaces, and communities.
