

# Haystax:

## School Safety, Optimized for Action

### The Challenge:

Schools face an ever-evolving array of threats, from physical intrusions to behavioral concerns and community risks. Ensuring the safety of students, faculty, staff, and visitors requires more than just physical security measures—It demands a holistic, human-focused approach. The challenge lies in integrating threat intelligence, emergency preparedness, and real-time communication into a single, actionable system that aligns security teams, school administrators, and first responders.

### The Solution:

**Haystax for School Safety** provides a unified, intelligence-driven solution that prioritizes human security. By merging critical safety data—physical assessments, behavioral evaluations, threat indicators, and real-time alerts—into a single, shared view, schools can proactively assess risks, strengthen security measures, and enable rapid, coordinated response.

### Key Features:

#### • Know Your Entire School Community

**Haystax provides a unified platform for school safety stakeholders to collaborate with a single, shared view.**

- Create and manage detailed safety profiles for each school, ensuring compliance with state and federal regulations.
- Conduct **Physical Assessments** to identify security vulnerabilities and implement best practices across all campuses.
- Address known and emerging physical security needs by integrating with Hx partners, including cameras, sensors, and access control systems, while optimizing and extending the value of existing security tools by incorporating their data into the Hx dashboard for real-time situational awareness shared across all stakeholders.
- Import and centralize emergency plans, facility layouts, key contacts, and resources for comprehensive preparedness.
- Perform **Student Behavioral Assessments** to proactively identify concerns, enhance intervention strategies, and foster a safer school environment.

#### • Understand Your Community Risk

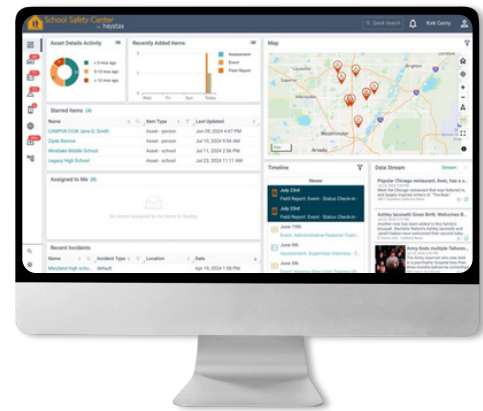

**Stay ahead of emerging threats with real-time intelligence and a proactive risk management approach.**

- Use dedicated mobile apps to report bullying, drug activity, weapons sightings, and suspicious behavior instantly.
- Overlay scheduled events—drills, assemblies, athletic events—onto security maps for enhanced situational awareness.
- Merge external data sources, such as news alerts, traffic reports, weather conditions, and emergency dispatch feeds, into a single interface for real-time threat evaluation.

#### • Real-Time Information Sharing

**Empower decision-makers with real-time updates, actionable intelligence, and secure information sharing.**

- Display all static and dynamic security data in a single, shared operational view. Decision-makers can track incidents in real time, tracking personnel and integrating key data sources including security tool data, digital media, and sensor feeds. Critical assets, routes, and terrain are mapped for full situational awareness.
- Receive automated alerts and reports accessible everywhere.
- Generate comprehensive reports based on assessments, incidents, and security trends to inform strategic planning and resource allocation.
- Utilize **Haystax Mobile**, a fully optimized app providing instant access to safety data, ensuring anytime, anywhere informed decision-making.

### Proven Success:

Trusted nationwide, Secure Passage equips K-12 districts and state agencies with real-time intelligence and proactive security, helping schools mitigate threats and protect students with comprehensive solutions for school safety.

Role-based permissions ensure secure access, enabling swift, informed action in emergencies.

## School Safety, Optimized for Action

### Secure Passage: Hx School Safety Center

Secure Passage is dedicated to public safety—especially when it comes to protecting schools. Over a decade ago, we designed and launched our first school safety solution based on extensive collaboration with district leaders, school administrators, security directors, campus law enforcement, counselors, teachers, and operations staff.

### Customer Spotlight: The State of Florida

In 2014, the **Haystax School Safety Center** was deployed statewide in Florida as the Florida Safe Schools Assessment Tool (FSSAT), a comprehensive solution designed to enhance school security across all 67 districts, 4,200 public schools, and 700 charter schools. Initially focused on managing school asset information and conducting physical security assessments, FSSAT has since expanded to include:

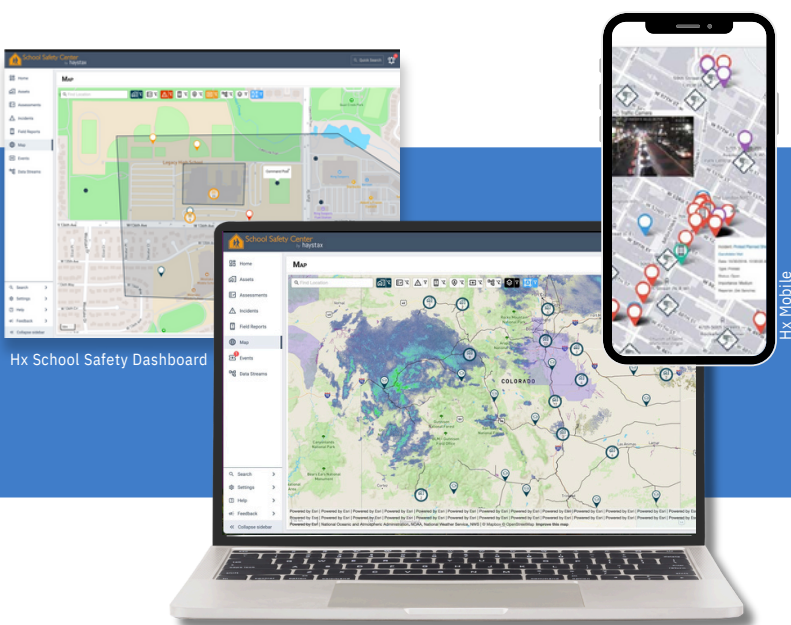

- Incident alerting and real-time threat intelligence
- Mobile field reporting for on-the-go data collection
- Event scheduling and safety drill management
- Digital monitoring and data analysis to assess security trends

Through a combination of licensing management, dedicated support, data science capabilities, and training and consulting services, Secure Passage plays a pivotal role in advancing school safety across Florida under the Office of Safe Schools (OSS).

Beyond Florida, the **Hx School Safety Center** has been deployed in K-12 districts and regional government agencies nationwide, including Arizona, California, Texas, Virginia, and Indiana. With real-time intelligence, seamless data integration, and a human-centered approach, Secure Passage helps schools prepare for any challenge—before, during, and after an incident.

### Customer Success

- **License Management:** Enables statewide access to the Hx School Safety Center, including school districts and charter schools, deployed as the Florida Schools Safety Assessment Tool (FSSAT).
- **Dedicated Support:** Full-time specialists assist with user management, assessments, updates, daily operations, data collection, and safety reporting, ensuring seamless implementation and compliance.

### About Secure Passage:

Secure Passage is a leader in school safety technology, redefining human-centered security with innovative solutions that unify data, enhance situational awareness, and drive smarter decision-making. In today's world where threats are complex and interconnected, Secure Passage is committed to safeguarding what matters most: the lives of students, staff, and communities by delivering proactive, intelligence-driven security solutions.
