

# Haystax: Public Safety for Law Enforcement

*Seamless Command & Control*

Daily, law enforcement professionals are called upon to perform a broad range of tasks – from routine patrols, intelligence gathering and investigations, to major crime and incident responses. Their challenge is to ensure public safety despite incomplete intelligence, limited cross-jurisdictional information sharing, and tight budgets. The **Haystax Public Safety Platform** helps law enforcement agencies prepare and respond to any crisis with a dynamic picture of emerging threats, rapid intelligence-collection and incident-reporting tools, and a seamlessly integrated user environment that ensures maximum collaboration and analytically sound command decisions for rapid response, when every second counts.

## Digital Intelligence

The **Haystax Public Safety Platform** significantly eases reliance on radios, paper maps, and filed interview cards. It combines mobile and we-based applications for managing critical asset data and real-time digital feeds. With the **Haystax Mobile Assessments App** capturing security, access, utility and other data on important facilities, incidents and scheduled events can be monitored within one building or across an entire metropolitan region, with full data compilation capabilities for reporting and information-sharing needs.

## Connect the Dots

The **Haystax Public Safety Platform** helps investigators and analysts connect the dots, giving them the ability to maintain complete domain awareness of the threat environment. For example, the **Haystax Field Interview App** collects and instantly displays detailed data on suspicious persons and vehicles, enabling link analysis within a rich and searchable database of prior field interviews. All asset, assessment, incident, and event information can be quickly cross-referenced with the emerging intel, viewed on a map or in a timeline, and shared across multiple stakeholders, regardless of where they are located.

## Seamless Command & Control

During incident response and recovery operations, law enforcement decision-makers can monitor developing situations and track all personnel from SWAT teams to patrol officers with integrated **\*Blueforce** technology. Information on emerging threats is seamlessly integrated with CAD, ALPR, digital media, traffic and weather, sensor, and other third-party feeds. Additionally, this real-time information can be viewed on a digital map, in context with geo-tagged critical assets, roads, natural terrain, and other pre-loaded static data. As a result, Commanders get the complete domain awareness they need to respond quickly and with confidence.

## About Secure Passage

**Secure Passage** is renowned for providing the **right information at the right time** for federal, state, local, and enterprise security teams. We help secure everything from the neighborhood school to major assets and critical infrastructure, as well as events on the world stage including political conventions, papal visits, the Indy 500, and a dozen Super Bowls.

\* Haystax is proud to partner with Blueforce – see our website for a full listing of partnerships and services.

# Haystax: Public Safety for Law Enforcement

## Customer Success Stories

For more than a decade, metropolitan police departments from Los Angeles to Houston and Indianapolis to Tampa have relied upon the **Haystax Public Safety Platform** for information sharing and total domain awareness.

Departments use our tightly integrated suite of web and mobile apps to gather incident and filed intelligence reports, analyze and prioritize their biggest threats, and ensure that their responding officers are better informed and coordinated. Their analysts monitor the Haystax Platform's real-time local and regional news/RSS feeds to improve their understanding of threats and to sharpen responses. Special Teams turn to our detailed asset catalogs to pinpoint critical facility information during major sporting events and protests, as well as crimes, accidents, and other emergencies. One senior regional intelligence Fusion Center official extolled the **Haystax Public Safety Platform** as his officers were "able to quickly generate and evaluate field data against other information in the Haystax Platform, including critical infrastructure and key resources and suspicious activity reports."

"... officers were able to quickly generate and evaluate field data against other information in the Haystax Platform."

## The Haystax Platform Advantage

- 
**Awareness:** View integrated incident asset and event data in a secure cloud environment where **Haystax** will organize your data, spotlighting needed areas for action.
- 
**Mobility:** Field personnel become sensors, for improved intelligence.
- 
**Insights:** Empowers commanders with actionable, real-time information, across jurisdictions.
- 
**Cost-Effectiveness:** Rapid, cloud-based deployment, intuitive user training with lower operating costs. In addition, the **Haystax Platform** seamlessly integrates almost all data and security tools, *enhancing the power of your existing tools and investments.*
